

**Parkland School District
Continuous Energy Improvement (CEI) Scope
Kratzer Elementary School
August 2017 through July 2018**

The Parkland School District (PSD) in Allentown, Pennsylvania, is in the third year of implementing strategies to conserve energy throughout the district. Kratzer Elementary will be starting a new baseline year this year and therefore will not set a percentage goal of energy savings.

Kratzer Elementary will be working with the other PSD schools to incorporate different strategies in order to maximize the potential we have for saving energy, resources and dollars. Our focus at Kratzer will be to educate students and their families of energy saving habits and practices they may try at home to conserve energy. We will strive to change and improve our behavioral culture increasing staff and student awareness. We will increase student involvement in this energy saving process. We will promote awareness and increase recycling of the building's various consumables where possible.

Communication is an important component of our ongoing success. We will willingly hold and attend monthly Energy Team meetings and engage in presentations and discussions with our staff. The goals of the monthly meetings are to look at the previous month's usage and ideas for gaining support from the entire building to ensure success.
